

*Royal Design 3D*

CATALOGO 2018

Innovation passes from simple and trendy intuitions.  
Shapes, shadows, facets and design textures:

## **the Royal Design 3D three-dimensional ceramic surfaces give new life to your walls.**

We are pleased to present the range of Royal Design 3D wall coverings, a solution to quickly and easily customize the walls of houses, shops, offices, showrooms and much more.

The three-dimensional design allows the creation of an elegant scenographic effect, thanks to the trick of the light and shadow.

The panels, in plaster or marble powder, can be applied to any type of wall by means of a special adhesive for stuccos. Moreover, once applied, they can be treated with varnish, paint or finishing as you wish.

We aim for excellence. The basis of Royal Design 3D realizations are: the continuous research, the analysis of the product, the design entrusted to the creativity of our designers. All this to offer you a product with high quality standards.

All our coatings are made with certified Italian products and are strictly

**produced in Italy.**
